Chapter VI: Insect Management | Vegetable Resources Common Insects Attacking Vegetable Crops Soil Insects Wireworm. Plants Attacked: Corn, small grains, grasses, potatoes and other root crops such as sweet potatoes. Description: Adults are usually hard shelled, brownish gray or nearly black, somewhat elongated with the body tapering toward each end. The larvae usually are hard, dark brown, smooth, wire like worms from ½ to 1½ inches long when grown. Insect Management - New England Vegetable Guide A successful insect management program can best be accomplished by combining IPM techniques, such as accurate pest identification, scouting, monitoring and action thresholds, with biological and alternative (preventative) control practices and selective insecticide applications if needed. Vegetable Insect Management in Georgia - UNIVERSITY OF GEORGIA The vegetable industry in Georgia represents a \$0.8-0.9 billion farm gate value each year. Losses due to insect pest damage or control costs can reach 5% or more for many of the vegetable commodities. Integrated pest management of key insect pests is critical to managing these risks in vegetable crops.

Vegetable Scouting Project Davis County 2011 - 2013 Erin Petrizzo, Scout Funded by a. Insect Management in the Home Vegetable Garden If an insect is identified as a destructive species, determine whether it is causing serious damage to the crop before making management decisions. Chemical control can cause additional problems by killing natural enemies of many pests. Aim to use the least disruptive pest control methods. Most garden plants can tolerate some insect feeding, and pests can often be washed off after harvest. Preventative Insect Management Practices Insect Management Strategies Effective insect and mite management involves at least seven steps: 1. Preventive practices. 2. Properly identifying key pest insects and mites, and beneficial organisms. 3. Selecting and using preventive pest management practices. 4. Monitoring the current status of insect and mite populations. 5.
